OBJECTIVE

Final-year CSE student with hands-on experience designing distributed, fault-tolerant systems and applying data structures, algorithms, and object-oriented design to build scalable software. Seeking a Software Development Engineer internship to contribute to large-scale distributed systems and grow through real-world engineering challenges.

EDUCATION

Bachelor of Engineering (CSE), GSSSIETW, Mysuru — CGPA: 8.89 (up to 6th Semester)
Pre-University, Sri Aurobindo PU College, Shivamogga — CGPA: 9.56 - 2023
SSLC, Govt. Girls High School, Davanagere — CGPA: 9.78 - 2021

TECHNICAL SKILLS

Languages : C, C++, Python, Java (Basics)
Core CS : Data Structures & Algorithms, Object-Oriented Design, Operating Systems, DBMS
Tools & Systems : Docker, MongoDB, Flask, Git, Distributed Systems(Concepts), AWS (Basics)

PROJECTS

Distributed Database Sharding System - Pure Storage "EmpowerMe" Mentorship Link

- Designed and benchmarked 5 distributed routing architectures (Hash-Based, Random, Round Robin, Directory-Based, Single-DB baseline) across 3 MongoDB shards using an asyncio/aiohttp routing layer.
- Achieved an 89.1% reduction in average query latency (27,437ms to 2,992ms) with Hash-Based Sharding at 10 million records, isolating each architecture in its own Docker container for fair benchmarking.
- Diagnosed and resolved key distributed-systems failure modes - index-masked performance gains, sequential request bottlenecks (fixed via async I/O), and cross-container resource contention.

DolFin - AI-Guided Investment Learning Platform (System Architecture Lead)

- Architected a scalable client-server system with a React front-end, Flask/FastAPI back-end, and Firebase Firestore for real-time data sync across concurrent users.
- Designed the data pipeline integrating live market feeds with an ML-based recommendation layer, balancing responsiveness with system reliability.

Grid-World Reinforcement Learning Environment

- Built a custom RL environment in Python with a reward-shaping algorithm and Pygame-based visualization for agent navigation and obstacle avoidance.

CERTIFICATIONS

- AWS Machine Learning Foundations
- Introduction to Generative AI - Google
- Introduction to C Programming - SoloLearn
- 100 Days of Code in Python - Udemy

ACHIEVEMENTS & EXTRACURRICULARS

- Research abstract accepted at the 46th COSPAR Scientific Assembly, Florence, Italy - applied Random Forest models to JWST data for photometric redshift estimation.
- Programming Lead (Education) & STEM Projects Director, She Orbits - led a foundational Python course in 2025 with 40+ global participants across 9 sessions.
- TiE U Pitch Fest 2025 - Runners-Up, Ideation Track
- Blockchain Technology Competition - First Prize Winner
- Linux Quest 2024 - First Place Winner
