PROFESSIONAL SUMMARY

Final-year B.E. Computer Science (AI/ML) student with hands-on experience in machine learning, backend engineering, and rapid prototyping. Five national and international hackathon placements (incl. runner-up at TiE U 2024) demonstrate strong execution under pressure and an entrepreneurial, problem-solving approach. Seeking a role to apply these skills to real-world engineering challenges.

TECHNICAL SKILLS

Languages: Python | Java | C

ML & Data: PyTorch | Scikit-learn | XGBoost | statsmodels | NumPy | Pandas | spaCy | Reinforcement Learning

Backend & Frameworks: FastAPI | Flask | React | LangGraph | RAG | Ollama | Pydantic | Docker | Docker Compose

Tools & Cloud: Git | Google Cloud Platform (GCP) | REST APIs | Pytest | Playwright | Neo4j | Qdrant | PostgreSQL

Spoken Languages: English | Hindi | Kannada

EDUCATION

Vidyavardhaka College of Engineering — B.E. in Computer Science (AI & ML), CGPA: 8.1 *Expected 2027*

Base PU College, Mysuru — Class 12th (PUC) *2023*

Vijaya Vittala Vidyashala, Mysuru — Class 10th *2021*

PROJECTS

RDTII-AEGIS — Autonomous Regulatory Evidence Mapping (UN ESCAP RegTech Hackathon 2026) | GitHub

Built an end-to-end RegTech pipeline that crawls live government law portals (Playwright), extracts clauses from native and scanned PDFs (pypdf + OCR), and maps provisions to the 44-indicator UN RDTII framework across 3 jurisdictions and 25 statutes. Designed a 5-layer anti-hallucination framework (verbatim locking via edit distance, dual-path verification, authority gating) with mandatory human sign-off through a React audit UI. Local-only LLM inference (Ollama: Llama 3.1, Qwen 2.5, BGE-M3) over a Neo4j + Qdrant evidence graph, deployed via Docker Compose. 70 modules at 98% return-type annotation coverage under mypy and ruff, with 593 tests including 68 Hypothesis property-based.

ICU Drug Titration Environment — RL Benchmark (Scaler Meta Hackathon, Meta OpenEnv)

Built an OpenEnv-compliant reinforcement-learning environment for ICU drug titration: a deterministic physiology engine with cross-drug interaction modeling (6 drugs, 5 vitals, 4 labs) that stays bit-reproducible across runs, with dense reward shaping and task-specific deterministic graders across 3 difficulty tiers. Exposed via a FastAPI REST API with an LLM agent harness and Docker deployment; validated by a 32-test suite. Grand finalist — top 800 of 53,000+ teams.

ChargeSmart — EV Charging & Route-Planning Platform (Infosys Global Hackathon)

Full-stack EV platform (React/TypeScript) for station discovery, slot booking, and route planning with optimized charging stops. Built a charging-demand model on a real 247-station dataset (137k training rows) predicting next-hour occupancy at MAE 0.023 — 64% better than a daily-naive baseline, 20% better than persistence, at 99.6% busy-state accuracy. Reached national finals — top 33 of ~1,900 teams; only student team from Mysuru.

ACHIEVEMENTS & ACTIVITIES

- Runner-up, TiE U Global Hackathon 2024 — selected from 1,300+ participants; invited to TiE Global Summit 2024.
- Runner-up, Skillathon 2025 (Bengaluru Skill Summit) — from 250+ teams; received the Kaushalya Karnataka Award from the Minister for Entrepreneurship.
- Grand Finalist, Infosys Global Hackathon — top 33 of 1,900+ teams; only student team from the Infosys Mysuru Development Center.
- Finalist, Scaler Meta Hackathon 2026 (Reinforcement Learning) — top 800 of 53,000+ teams.
- Competed in the UN ESCAP RegTech Hackathon 2026 (UNCAP, Bangkok), an international digital-trade regulation challenge — built and open-sourced RDTII-AEGIS (Apache-2.0).
- Best Achiever (Co-curricular) Award, Dept. of CSE (AIML), Vidyavardhaka College of Engineering.
- Organized national-level Vibeathon 2026, securing sponsors including Kiro and Figma; active in Solana Hacker House and SAP Labs Vibeathon; contributed to tech outreach for government school students.

CERTIFICATIONS

- Machine Learning Specialization — Andrew Ng (DeepLearning.AI / Stanford)
- Certificate of Merit — ISRO START Program
- Google Cloud Career Launchpad — Data Analytics & Cloud Engineer Tracks
